DETAILED ACTION

Response to Amendment

In view of Applicant's amendment received May 21, 2004, amendments to claims 17, claim 25, and claim 27 have been entered.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joshua N. Randall on August 20, 2004.

The application has been amended as follows:

Claims 28 and 29 have been canceled.

Allowable Subject Matter

Claims 1-4, 6,7,10-13, 15-17, 24, 25, 27, and 30 are allowed.

Claims 5, 8, 9, 14, 18-23, 26, 28, and 29 are canceled.

Reasons for Allowance

Claims 1, 24, 25, and 27 are independent.

In the Office Action mailed March 1, 2004, allowable subject matter and reasons for allowance were indicated for claims 10, 11, and 24. Applicant has amended claim 25 to include the allowable subject matter of claim 10; therefore, claim 25 is allowed.

Regarding claim 1, while prior art discloses a utility support structure comprising a hollow reinforced beam with a plurality of transverse holes and a plurality of hollow reinforcing members placed in an interior of the beam such that the inner diameter of the reinforcing member is approximately the same as the diameter of the transverse hole (as shown in US Patent 5,505,036 to Wiles), prior art fails to disclose one hollow reinforcing member being aligned with each transverse hole.

Similarly for claim 27, while prior art discloses a utility support structure comprising a plurality of hollow reinforcing members and a hollow fiber reinforced beam with a plurality of transverse holes extending through the beam at locations along the beam length, the diameter of the holes substantially the same as the inner diameter of the hollow reinforcing members, the beam configured to receive the hollow reinforcing members, prior art fails to disclose that each transverse hole is the only transverse hole through the beam at each longitudinal position along the length of the beam.
